

Technology Law & Entrepreneurship Concentration

Michael B. Dorff

Technology Law & Entrepreneurship Program Director

This specialized program allows students to focus on a rich curriculum emphasizing technology law. The program recognizes that the fast-changing environment of high-technology industries requires lawyers capable of developing and implementing innovative legal strategies. The program prepares students for the 21st Century workforce by allowing them to participate in a structured series of advanced courses including intellectual property, technology law, commercial transactions, corporate structuring, entrepreneurship, and regulatory, administrative and international law, and more...all leading to a Concentration reflecting their acquired expertise.

Upon meeting the curricular requirements, students receive a designation on their transcript acknowledging this Concentration in Technology Law and Entrepreneurship in addition to the student's J.D. degree.

Eligibility

Students should register for the Concentration at the end of their first year (end of the third semester for part-time students) and must be in good academic standing.

Students completing the program requirements with a GPA in Concentration courses of 3.33 or higher receive a "Concentration in Technology Law and Entrepreneurship with Honors" designation on their transcript. Complete the TL&EC Declaration of Intention Form and return it to the Registration Office.

Curricular Requirements

Students must take at least 15 units (8 Core and 7 Elective) from the designated course list below.

Student Groups

Participating in Student Organizations is a great way to enrich the law school experience. These groups offer support and mentoring programs; sponsor workshops, volunteer and networking opportunities, community outreach projects, cultural and social events, interscholastic competitions, and hundreds of speaker presentations each academic year. Groups that may be interesting to Technology Law and Entrepreneurship Concentration students include Students for Technology Law & Entrepreneurship (“STyLE”), Intellectual Property Law Society, Labor & Employment Law Association, and the Tax Law Society.

If there isn't a group that fits your specific interest you may be able to start your own! Please contact the Student Affairs Department for more information.

Career Insights

The fast-changing environment of high-technology industries creates a demand for lawyers capable of developing and implementing innovative legal strategies. Southwestern is in an ideal location to serve as a pipeline to the hundreds of start-ups, incubators, and tech finance companies in Silicon Beach and the surrounding counties. This certificate program provides students with the legal training they will need to serve these young companies or even to start their own new ventures!

*Not all courses are offered every year, and students must meet all course prerequisites and requirements. This Concentration does not change any course prerequisites.
